CE4 Auto Index Changelog

v7.0.8 (2016-01-07)

- During auto index setup, now using PHP "include_once" for improved server compatibility, v. previously using "include".
- Server compatibility improvements for auto index and PHPlugins scripts.

v7.0.7 (2015-06-30)

- Fixed a fatal error with the masonry layouts introduced in 7.0.6.
- Fixed an issue with sharing buttons' background-color when center-aligned.

v7.0.6 (2015-06-25)

- New: Masonry layouts.
- Increased the standard "width_in_digits" value for UI sliders from 4 to 5, to better accommodate slider values to the thousandths' place.
- Removed 'minimal-ui' switch for iOS 7, as it is no longer supported in subsequent versions of Safari.
- Repaired the Masthead's "Separation" slider, which controls the space between the H1 and H2 headings.
- Updated apple-touch-icon.png to 180-pixels-square, in accordance with Apple's UI guidelines for the iPhone 6 Plus, etc.
- Updated currentPageURL() function. [#p28183](#p28183)
- Updated script for R2D2 navigation menu to not interfere with the Integrated masthead hyperlink.
- Updated to jQuery 1.11.3 from 1.11.0.

v7.0.5 (2014-11-28)

- About.me button added to social media profiles.
- Added "Icon Background-color :hover" option for social media profile and sharing buttons.
- Added *<meta name="title" … />* element.
- Fixed definition of PAGEIMAGE.
- Improved handling of social network sharing.
- New checkbox option "Fade Description" allows you to enable/disable fading effect on album descriptions in the auto index.
- Sanitize ampersands (&) in Album Title and Description.
- Simplified and improved the classes *edge-to-edge*, *edge-left* and *edge-right*.
- The generic "User" social profile button is now disabled by default.
- Eliminated the superfluous file 10-presentation.css and all references thereto.
- Updated Integrated masthead type when multi-level navigation is right-aligned.
- Updated Gill Sans font-family to accommodate weird Chrome/Win bug.

v7.0.4 (2014-09-01)

- New "Integrated" masthead option.
- New aesthetic option, **Navigation Container** > **Render Borders…** > **Split**.

- Fixed masthead's border-left inheriting the border-right value.
- Significant refactoring of navigation menu's CSS and plugin source.
- Updated autoindex-view.php debug() function.
- Updated Cart integration script.

v7.0.3 (2014-08-15)

- All new font-stacks, balanced for modern devices.
- Updated scaffolding.css.
- Updated ttg.init.defer.min.js.

v7.0.2 (2014-07-29)

- Added Behance, Flickr, Vimeo and YouTube to social media profiles.
- Added script to check whether content exists in .the-block; if not, then is hidden. Helps to do away with extra padding in publisher templates when the gallery has no description.
- Apostrophes should no longer break Album Titles.
- Fixed a typo that prevented shared resources being used, even when the option was enabled.

v7.0.1 (2014-07-24)

- Fixed separation of Master and Guest credentials for password protection inputs.
- Updated scaffolding .push, .pull classes for left:0 under mobile breakpoint.

v7.0.0 (2014-07-16)

- Public release.
