- Replace the **ttg-be/cart/lib** directory
- Log in as admin to **ttg-be/cart/admin**

v3.1.1 (2015-07-01)

- Only collect tax for Euro countries if selling to other Euro countries
- Option to prevent selling Digital Downloads to Eurozone, other than to own country if part of Eurozone
- New mode for additional fields - whether these should appear on Transactionless, Paypal, or Both. This will help EU customers create a field for VAT if needed for offline handling of tax exemption. Or any other fields such as Instructions for Photographer.
- New option for back-calculation of tax
- Capture of IP address per order for auditing
- Standardise email subject tokens with CRG - now supports [ORDER_NUMBER], [CUSTOMER_NAME] and [CUSTOMER_EMAIL] for vendor, [ORDER_NUMBER], [COMPANY_NAME] and [COMPANY_URL] for customer
- Added Markdown support for Order Intro/Outro
- New setting and messages to limit cart to only discount or coupon, not both
- New setting to allow \$0 orders to bypass minimum spending amount
- Alternate product text for modal, so that users can add something more inviting for the cart model without affecting other areas that 'Product' is used
- Added total products ordered to order emails
- Removal of "0 [CURRENCY]" in dropdowns in purchase modals
- Changed package item selector to fixed field when only one type of item left to add to the cart
- Changed email sending to occur after displaying message of successful order
- Updated settings pages to support multi-line settings, markdown and info icons on view page
- Setting for Digital Download path, to cater to carts that are confused with paths between subdomains

- Added check for unique additional fields 'field'
- Added handling of Paypal pending echeque, resulting in order status of Pending
- Fixed bug in changing the download expiry date
- Fixed bug in package assignment not providing dropdown when only one product but more than one package-product
- Fixed bug with edit cart item losing values
- Added workaround for Safari mobile modal not being scrollable on first launch
- Fixed issue with with finding photos with galleries over https
- Added colon to product name in purchase dialogue
- Improved handling of Paypal thank-you page

- Fixed info buttons on various admin pages
- Added JavaScript to pricing scheme product assignment, so that clicking a product name will toggle the checkbox.

To update to Cart 3.1.1:

- Replace the **ttg-be/cart/application** directory
 - Replace the **ttg-be/cart/lib** directory
 - Log in as admin to **ttg-be/cart/admin**
-

v3.0.5 (2014-09-19)

- Fixes an issue with reuse of coupons within the same cart

To update to Cart 3.0.5:

- Replace the **ttg-be/cart/application** directory
 - Log in as admin to **ttg-be/cart/admin**
-

v3.0.4 (2014-09-02)

- Updates the handling of thumbnails-for-mobile for compatibility with Gallery 6.1.0
- Fixes an issue that prevented digital downloads from being found for non-Publisher galleries
- Fixes an issue when saving the selection of products for a pricing scheme in the case that no packages exist
- Fixes an issue that prevented package descriptions from updating after changing package selection
- Fixes an issue of digital purchases being named as the photo title during download rather than the image or other filename

To update to Cart 3.0.4:

- Replace the **ttg-be/cart/application** directory
- Replace the **ttg-be/cart/lib** directory
- Log in as admin to **ttg-be/cart/admin**

v3.0.3 (2014-08-21)

- Added sort order field for products, when configured in pricing schemes
- Added package item names to list of 'Items in this order' in vendor email
- Added tax into package prices for 'add package to cart' dialogs, when Display Tax Upfront is enabled
- Fixed layout issue with customer cart error messages

To update to Cart 3.0.3:

This release requires an update to TTG BE 2.0.2, with files included in your available Publisher downloads.

1. If you have not already updated to TTG BE 2.0.2 as part of a Publisher or Pages update, then:

- Replace **ttg-be/admin** and **ttg-be/framework** with the files in the included CE4-TTG-BE-202.zip file
- Log in as admin to ttg-be/admin

IMPORTANT NOTE : Do NOT replace the entire ttg-be directory! Doing so will cause publisher to lose ALL settings!

2. Update TTG Cart:

- Replace the **ttg-be/cart/application** directory
- Replace the **ttg-be/cart/lib** directory
- Log in as admin to **ttg-be/cart/admin**

v3.0.2 (2014-08-05)

- Reskinning of customer-facing cart pages, with a focus on improved mobile support
- Fixes an issue on final Paypal checkout when attempting to submit without selecting required checkboxes
- Fixes issue with download links appearing when no digital downloads were purchased
- Fixes an issue that prevents adding new shipping methods when packages exist
- Fixes an issue in matching the correct pricing scheme when updating an item in the cart
- Changed handling of shipping methods:
 1. Physical products and packages can only be added to the cart when self-collection or a local shipping method is enabled and valid

- Country selector is presented before Shipping Method selector, as the available Shipping Methods depend on the selected Country

- Default shipping method is selected when the user first views the cart

Upgrade Instructions for v3.0.2

1. Replace the following three directories within the ttg-be/cart directory on your server:

- application
- lib

2. Login to **ttg-be/cart/admin**, to complete the database upgrade

v3.0.1 (2014-07-29)

- Fixes issue with missing localisation of 'Not Yet Assigned' for packages
- Fixes issue with over-size placeholder package image, that breaks mobile formatting

Upgrade Instructions for v3.0.1

- Replace the following directories within the ttg-be/cart directory on your server:

- application
- lib

- Login to admin at ttg-be/cart/admin to complete upgrade process

v3.0.0 (2014-07-24)

- Initial release
