CE4 Pages Changelog

v7.0.15 (2016-01-07)

- During auto index setup, now using PHP "include_once" for improved server compatibility, v. previously using "include".
- Server compatibility improvements for auto index and PHPlugins scripts.

v7.0.14 (2015-06-30)

- Fixed a fatal error with the masonry layouts introduced in 7.0.6.
- Fixed an issue with sharing buttons' background-color when center-aligned.

---

v7.0.13 (2015-06-25)

- New: Masonry layouts.
- Increased the standard "width_in_digits" value for UI sliders from 4 to 5, to better accommodate slider values to the thousandths' place.
- Removed 'minimal-ui' switch for iOS 7, as it is no longer supported in subsequent versions of Safari.
- Repaired the Masthead's "Separation" slider, which controls the space between the H1 and H2 headings.
- Updated apple-touch-icon.png to 180-pixels-square, in accordance with Apple's UI guidelines for the iPhone 6 Plus, etc.
- Updated currentPageURL() function. #p28183
- Updated script for R2D2 navigation menu to not interfere with the Integrated masthead hyperlink.
- Updated to jQuery 1.11.3 from 1.11.0; exports still include the jquery-1.11.0.min.js file so as not to break older version exports using the file via the Share Resources option.

---

v7.0.12 (2014-12-01)

- Various bug fixes.

---

hotfix 7.0.11b (2014-11-29)
shows as version 7.0.11 in LR; the downloaded zip file shows 7011a.

- Fixed auto index error.
- Fixed sharing icon background-color on hover.

v7.0.11 (2014-11-28)

- About.me button added to social media profiles.
- Added "Icon Background-color :hover" option for social media profile and sharing buttons.
- Added *<meta name="title" ... />* element.

- Fixed definition of PAGEIMAGE.
- Improved handling of social network sharing.
- New checkbox option "Fade Description" allows you to enable/disable fading effect on album descriptions in the auto index.
- Removed Tumblr sharing button; should have been removed a long time ago due to changes in Tumblr's API, but I missed pulled it out of CE4 Pages. Sorry!
- Sanitization of ampersands, quotation marks and line-breaks in image titles and captions, and in the Album Title and Description.
- Simplified and improved the classes *edge-to-edge*, *edge-left* and *edge-right*.
- The generic "User" social profile button is now disabled by default.
- Updated Integrated masthead type when multi-level navigation is right-aligned.
- Updated Gill Sans font-family to accommodate weird Chrome/Win bug.
- Updated logic for excluding images from the Galleria Slideshow when the images are assigned to appear elsewhere.

---

v7.0.10 (2014-10-18)

- Added "Priority" option for the Gallery, allowing the Galleria Slideshow to be positioned beneath the block content; previously could only be positioned above.
- Added "randomize" option to the Galleria Slideshow presentation, which randomizes the sequence of images on page load.
- Fixed ID mismatch between HTML and CSS that prevented text-align settings from being applied to the main column for each page.
- Updated assets repository for shared resources.

v7.0.9 (2014-09-01)

- New "Integrated" masthead option.
- New aesthetic option, **Navigation Container** > **Render Borders…** > **Split**.
- Fixed masthead's border-left inheriting the border-right value.
- Significant refactoring of navigation menu's CSS and plugin source.
- Updated autoindex-view.php debug() function.
- Updated Cart integration script.
- Added freewall to script repository for shared resources.

v7.0.8 (2014-08-15)

- All new font-stacks, balanced for modern devices.
- Changed sharing buttons to use CURRENTPAGEURL instead of CURRENTPAGELOCATION.
- Fixed title overlays in the gallery index.
- Updated "Touch" presentation script for shared resources with CE4 Gallery.
- Updated to a newer version Parsedown processor.
- Updated to Galleria 1.4.1.
    - Implemented hack for Galleria full-screen view to workaround viewport height bug in iOS7 Safari on iPad.

v7.0.7 (2014-08-05)

- Minified Galleria theme script for faster loading.
- Updated ttg.init.defer.min.js.

- Updated scaffolding.css.
- Updated Touch-n-Swipe assets to correspond to updates in CE4 Gallery; used for resource sharing, so no direct impact on CE4 Pages.

v7.0.6 (2014-07-29)

- Added Behance, Flickr, Vimeo and YouTube to social media profiles.
- Added various scripts to the /lib folder for use by Shared Resources setting in Gallery and Stage.
- Apostrophes should no longer break Album Titles.
- Fixed a typo that prevented shared resources being used, even when the option was enabled.
- Height for images assigned to the block and grid is now explicitly set to height:auto.

v7.0.5 (2014-07-24)

- Added alignment controls for each page's content and sidebar areas.
- Added float (alignment) control for each page's Media Area / Still Image.
- Fixed max-width for images in the-grid.
- Fixed meta description.
- Updated scaffolding .push, .pull classes for left:0 under mobile breakpoint.

v7.0.4 (2014-07-18)

- Fixed Galleria full-screen toggle buttons being invisible.

v7.0.3 (2014-07-18)

- Fixed apostrophes in contact form. #p20585

v7.0.2 (2014-07-18)

- Revisited the 7.0.1 fix and fixed it better.

v7.0.1 (2014-07-17)

- Fixed images not being excluded from the gallery when assigned to appear on other pages.

v7.0.0 (2014-07-16)

- Public release.
