

the Media Area

the Media Area

The media area, a.k.a. The Grid.
Cannot appear on the same page as the Auto Index.

the Home page

Content Type Still Image ▾
Priority Above Content ▾

Embed a single still image into the grid.

Get Image by ID
Max-width

You may assign a generic block item - "the grid" - to appear on any page. This may be used to add a still image to the page, or to create an outlet for PHPlugins where you may shim your own content into the page. For example, you might use PHPlugins to display a Google Maps route to your studio.
