

Adding Templates to CE4 Publisher

CE4 Publisher accepts two template types, explained below.

Gallery Templates

Gallery templates may be created using **CE4 Gallery** or **CE4 Stage**.

These templates are used to publish albums, to display image search results, and by CE4 Cart to display the cart view.

Gallery templates should be uploaded to:

```
/ttg-be/templates/gallery
```

Auto Index Templates

Auto Index templates are created using **CE4 Auto Index**, and are used to create and display Album Sets.

Auto Index templates should be uploaded to:

```
/ttg-be/templates/autoindex
```

For more information, see [Working with Album Sets](#).
