CE4 Stage Changelog

v6.1.6 (2016-04-03)

- Updated the Full-screen: Auto presentation.
    - New "Cover" option allows images to fill, fit or repeat.

v6.1.5 (2016-01-07)

- Server compatibility improvements PHPlugins script.

v6.1.4 (2015-06-16)

- Fixed social media image references when using gallery as Home page via CE4 Pages and Publisher.
- Removed 'minimal-ui' switch for iOS 7, as it is no longer supported in subsequent versions of Safari.
- Repaired the Masthead's "Separation" slider, which controls the space between the H1 and H2 headings.
- Updated to jQuery 1.11.3 from 1.11.0.

---

v6.1.3 (2015-04-15)

- Increased the standard "width_in_digits" value for UI sliders from 4 to 5, to better accommodate slider values to the thousandths' place.
- Removed Google Drive video support.
- Updated apple-touch-icon.png to 180-pixels-square, in accordance with Apple's UI guidelines for the iPhone 6 Plus, etc.
- Updated currentPageURL() function. #p28183
- ~~Fixed Video ID field for publisher-managed galleries and Google Drive video support.~~
- ~~Updated responsive Javascript for Google Drive video to accommodate https://docs.google.com URLs.~~

---

v6.1.2 (2014-12-15)

- Fixed YouTube embed code for publisher-managed stage pages.
- Updated script for R2D2 navigation menu to not interfere with the Integrated masthead hyperlink.

---

v6.1.1 (2014-11-28)

- New presentation, "Video: Google Drive", for embedding video uploaded to your Google Drive account.
- About.me button added to social media profiles.
- Added "Icon Background-color :hover" option for social media profile and sharing buttons.

- Added *<meta name="title" ... />* element.
- Fixed definition of PAGEIMAGE.
- Improved handling of social network sharing.
- Sanitization of ampersands, quotation marks and line-breaks in image titles and captions, and in the Album Title and Description.
- Simplified and improved the classes *edge-to-edge*, *edge-left* and *edge-right*.
- The generic "User" social profile button is now disabled by default.
- Updated Integrated masthead type when multi-level navigation is right-aligned.
- Updated Gill Sans font-family to accommodate weird Chrome/Win bug.

---

v6.1.0 (2014-09-30)

- release candidate 1 (2014-09-26)
  - New presentation, "Cinemagraph Pro: Embed" for embedding Cinemagraphy Pro videos from Flixel.com.
  - New presentation, "Full-screen: Auto", a full-screen, auto-playing slideshow.
  - Eliminated the superfluous file 10-presentation.css and all references thereto.
  - Fixed some inconsistencies between exported galleries and publisher templates for "Compare: TwentyTwenty" presentation.
- beta 3 (2014-09-21)
  - Added "randomize" option to the Galleria Slideshow presentation, which randomizes the sequence of images on page load.
  - New presentation, "Reel: Animate" for animating a series of frames (360-degree rotations, time-lapse images, etc.).
  - "Compare: TwentyTwenty" changes:
    - Additional overlay options, Alternate and Hide, and colors control.
    - Slider Offset now ranges from 0-100% in 1% increments.
- beta 2 (2014-09-11)
  - Praise modulo! Have convinced Lightroom to handle images in pairs!
    - "Compare: Morph" now supports multiple instances per page.
    - "Compare: TwentyTwenty" now supports multiple instances per page.
    - "Reel: Panorama" now supports multiple instances per page.
  - Captions support for Compare: Morph, Compare: TwentyTwenty and Reel: Panorama.
- beta 1 (2014-09-09)
  - New presentation, "Compare: Morph" for before-and-after image comparison; an updated version of the CE3 Before-and-After feature.
  - New presentation, "Compare: TwentyTwenty" for before-and-after image comparison.
  - New presentation, "Reel: Panorama" for horizontally-scrolling panorama images within a defined viewport.
  - Updated Gill Sans font-family.

---

v6.0.3 (2014-09-01)

- New "Integrated" masthead option.
- New aesthetic option, **Navigation Container** > **Render Borders...** > **Split**.
- Fixed masthead's border-left inheriting the border-right value.
- Significant refactoring of navigation menu's CSS and plugin source.
- template_index.php is now duped to template_mobile.php.

- Updated Cart integration script.

v6.0.2 (2014-08-15)

- All new font-stacks, balanced for modern devices.
- Minified Galleria theme script for faster loading.
- Updated scaffolding.css.
- Updated ttg.init.defer.min.js.
- Updated to Galleria 1.4.1.
    - Implemented hack for Galleria full-screen view to workaround viewport height bug in iOS7 Safari on iPad.

v6.0.1 (2014-07-29)

- Added Behance, Flickr, Vimeo and YouTube to social media profiles.
- Added drop-list of commonly used items for CE4 Publisher's metadata outlets.
- Added script to check whether content exists in .the-block; if not, then is hidden. Helps to do away with extra padding in publisher templates when the gallery has no description.
- Apostrophes should no longer break Album Titles.
- Fixed a typo that prevented shared resources being used, even when the option was enabled.
- Updated default margins and padding for the grid, as the previous defaults were not entirely obvious to users.

v6.0.0 (2014-07-24)

- Public release.
