

Retrieving Forgotten Passwords

There are two hidden functions for retrieving admin passwords:

1) To retrieve passwords for all users visit:

http://yoursite.com/ttg-be/admin/?a=retrieve_all_passwords

2) To retrieve passwords for a single user visit

[http://yoursite.com/ttg-be/admin/?a=retrieve_password&p1=\[USER_NAME\]](http://yoursite.com/ttg-be/admin/?a=retrieve_password&p1=[USER_NAME])

(replacing yoursite.com with your actual domain, and [USER_NAME] with the username, e.g. admin)

These create a file on your server that can be accessed via FTP at /ttg-be/data/admin/password.txt. The first function creates a list of usernames and passwords for all users. The second function outputs the password for the specified user.
