

Compare: TwentyTwenty

The Compare: TwentyTwenty presentation allows you to compare two versions of an image using a slider.

The presentation requires:

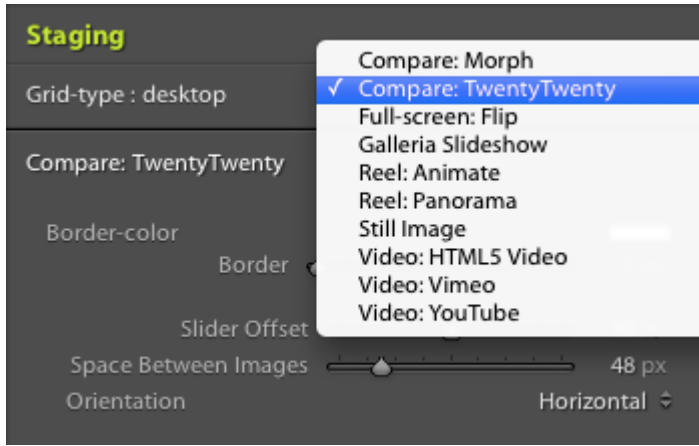

- A minimum two images in the filmstrip.
- An even number of images in the filmstrip.

Images are handled in pairs, the first image in each pair being the “Before” image, and the second the “After” image. Captions and metadata are supported for each pair, but will only be drawn from the “After” image.

The slider may be dragged to hide/reveal more of one image than the other. The slider may be set to split the images horizontally or vertically, depending on your configuration.

[See the Compare: TwentyTwenty demonstration.](#)

To use this presentation, under **Appearance > Grid-type: desktop**, choose “Compare: TwentyTwenty”.
